

# Implementing **welcomate™** for Your Establishment

There are several methods of implementing **welcomate™** for your establishment. Each method has its own advantages, limitations, and associated cost. You may begin at any level and upgrade at anytime.

## **welcomate™** Runtime Edition

### Advantages

- Standalone: requires no other software
- Requires only one computer

### Limitations

- Single-user: only one user at a time may use the system.
- You may not modify layouts or create new layouts (*i.e.*, you may not add your own promotions or modify existing ones, though this is available to you as a service from Baker Restaurant Systems.)
- You are responsible for making backup copies of your data.

## **welcomate™** with *FileMaker® Pro*

### Advantages

- Requires only one computer
- You may modify existing layouts and create new layouts
- You may take advantage of *FileMaker® Pro* to create your own databases
- Backup copies require less storage space than those of the Runtime Edition

### Limitations

- Single-user recommendation: while you may configure *FileMaker® Pro* to allow multi-user access to a database, there are certain risks in doing so.
- You are responsible for making backup copies of your data.

# welcomate™ with *FileMaker® Server* and *FileMaker® Pro*

## Advantages

- Allows complete multi-user access to the database
- You may host multiple databases, allowing you to manage all of your facilities on one server
- Provides for automatic backup of all of your hosted databases
- You may have remote access to your data for each of your restaurants from anywhere in the world, as long as you have access to a broadband internet connection
- You may allow remote access to your databases by Baker Restaurant Systems (this allows for more timely analysis of your data, faster addition and more immediate modification of promotional layouts)
- You may modify existing layouts and create new layouts
- You may take advantage of *FileMaker® Pro* to create and host your own databases

## Limitations

- You should dedicate a computer on which to run the *FileMaker® Server* software to host your databases.
- You will need one copy of *FileMaker® Pro* for each user for whom you wish to provide access to your data

<b>Product</b>	<b>Retail</b>	<b>Baker Restaurant Systems Price</b>

\*All *FileMaker®* bundle purchases made through Baker Restaurant Systems include one year of Maintenance provided by FileMaker, Inc. This means that so long as your Maintenance agreement is in-force, you will receive upgrades to any new versions of your copies of *FileMaker® Pro* and *FileMaker® Server* at no charge. Maintenance agreements are between you and FileMaker, Inc, and are renewable each year, so you may continue your coverage indefinitely.
